

Manufacturing Project Manager

Eteros is not your typical employer: we challenge the norm and never take no for an answer. We apply this philosophy to all aspects of our business, from the production floor, to engineering, to finance.

Since launching our flagship product, we have designed and released multiple new products and have more in the cue. We are looking for someone who is willing to put in the hours to help us get these projects across the finish line and has the grit to advance within the company.

Check out what we make here!

The culture at Eteros is extremely important to us. It is a tangible feeling that becomes contagious when you have the right people in place. So, what type of person is the 'right fit' for Eteros? Here is what we are looking for when it comes to fit:

Right Fit	Not a Fit
Can-do attitude	"That's not my job" mentality
Strong work ethic	Not eager to learn
Sense of urgency	Lackadaisical
Resourcefulness	Not putting in an honest day's work
Follow-through	Not a team player
Passion in your work	Not taking ownership
Happy people	Watching the clock

Requirements

- Certificate or degree from a mechanical and/or manufacturing program
- 5 or more years of project management experience

Salary

Commensurate with experience

Job Perks

In addition to working with an awesome group of people, Eteros offers a comprehensive benefits package after three months. After one full year of employment, employees are eligible to participate in the company's Employee Stock Ownership Plan.

Duties

- Developing project scopes and objectives for, as well as participating in, acquisitions, facility improvements, production and procurement initiatives/changes and product development.
- Ensuring that projects are delivered on time, within scope and within budget
- Tracking and reporting
- Leading the hand-over of new products from R+D to the Manufacturing Department
- Working with production and engineering staff to track and prioritize opportunities for improvement of quality control, manufacturing methods and supply chain
- Assisting with development and refinement of process controls
- Assisting with logistics improvements
- Create and maintain comprehensive project documentation
- Managing/overseeing existing and new patents
- Maintaining time and product development logs for SRED and other granting programs

Considered an Asset

- Experience managing projects and/or products in a manufacturing environment
- Superior verbal and written communication skills and fluency in English
- Ability to multitask, work under pressure, meet deadlines, and prioritize
- Experience with acquisitions and systems integration/amalgamation
- Experience with the patent process
- An understanding of revision control
- Experience with Salesforce or Similar CRM software
- Superior organizational skills
- A natural ability to provide creative solutions
- Persistence and drive
- The desire to learn new skills and self-improve
- A strong attention to detail
- Hands-on experience such as machining, fabricating, assembling, being a mechanic, or having a genuine love of building things since childhood

Applications
